

**VIBRATION ISOLATION MEMBER**

09829883

**ABSTRACT**

A vibration isolation member comprising an inner member comprising an  
outer periphery having a first dimension; an outer member comprising a base  
and a shroud that extends away from the base, the shroud adapted to overlay  
the inner member, said shroud defining an inner periphery having a second  
dimension, the second dimension being less than the first dimension; and a  
resilient member constrained between the shroud and the inner member,  
whereby the vibration isolation member provides iso-elastic dynamic stiffness  
and an interference between the inner and outer members in the event of a  
failure of the resilient member.
